The magazine of the Province of Holguín, could not be born with a better name than his, so that when he falls into his hands, he will suddenly know who reads, what is being talked about and what is beautiful about him.

In its pages, the reader will find illustrious children who take the name of their land to the top of Cuba and the world. To its most beautiful traditions and cultural events, to its natural landscapes, and to the effort we make to achieve the Holguín better we want to continue building all together.

It also serves the space to recognize how much is done for its economy, to improve the lives of those who inhabit it. Always, with the premise that there is no greater truth than that built with self-effort and honor.
