During the meeting, they considered prices in the sectors of the companies of Transport, Commerce, Gastronomy Services and the Food Production, among others, as well as their responsibilities in the sale and offer of services with quality in the new panorama of the Reordering Task.

"We have the great challenge of mediating between what happens in the business and private sectors in terms of the design of their prices and the people. And we must demand from the business sector that they cannot solve their inefficiencies with high prices," said governor Estupiñan Rodríguez.
