

In a meeting of the social economic group held this March 4th under the leadership of Yunia Perez Hernandez, Deputy Governor of Holguin, crucial issues were discussed in order to confront the resurgence of covid-19 in this Cuban province.

[Holguin implements new measures in response to covid-19 outbreak](#)

The available capacities as isolation centers in all municipalities were thoroughly reviewed, as well as the opening of the "10 de Octubre" polytechnic school in Macabí, Banes.

Given the importance of these places as a preventive measure for new possible contacts of cases, the minimum conditions of these places were checked with the people present in the meeting.

Information was given on the less complicated municipalities and those where an increase is expected in the next few days.

It was learned that the molecular microbiology laboratory of Holguín is working as usual, all cases are processed daily, which means no delay in these studies on the presence or not of the new coronavirus.

The need to use the means of transport wisely was once again stressed; in this regard, the Deputy Governor specified that they should be used in accordance with the number of cases sent to the isolation centers, and that a reserve should be available and ready to act in case of any

A call in Holguin on the rational use of resources in the combat of Covid-19
